🎓 Education

B.Tech in Computer Science and Engineering (Data Science), *DJ Sanghvi College Of Engineering*   Jul 2020 – present
CGPA:8.81

HSC, *Dnyan Ganga*   Jul 2018 – Mar 2020
84.5%

SSC, *Vasant Vihar High School and Jr. College*   Mar 2018
89.6%

🧠 Skills

Languages *(Python, Javascript, Java)* | **Development** *(Html, CSS, React, Flask, Django, Streamlit, NodeJs)*

Data Science *(Excel, Tableau, Pandas, Numpy, Scikit-Learn, Matplotlib, SQL,Power BI)*

📂 Projects

Comfy Sloth, *Furniture Store Website* 🔗
It is a furniture store website built with React and offers a modern and user-friendly interface for customers to browse and purchase products. The website offers search and filtering functionality, allowing customers to quickly find the types of furniture they are looking for based on factors such as style, colour, and price range.

Jobster, *Job Portal* 🔗
This website built in React and Redux provides a user-friendly and efficient platform for job seekers and employers to connect and facilitate the job search and hiring process. Employers have access to a dashboard where they can post job openings.

Car 101, *Selling Price Prediction For Used Cars*
Built a predictive model that can accurately predict the price of used cars using XGBoost.

Github User Info 🔗
This website shows information about any GitHub user and their GitHub repositories.

Sales Insight Dashboard, *Power BI Project*
Build a dashboard in Power BI generating insights from 5 years of Company data of sales and transactions.

Loan Approval, *ML Project*
I built a model for predicting loan approval status using XGBoost and deployed it with Flask.
